INDICES

Volume 38 (1997)

The editorial board
would like to express its warmest
appreciation and thanks to all

referees and authors

who have contributed to the 1997
issues of Acta Radiologica

SUBJECT INDEX TO VOLUME 38 (1997)

Nervous system (incl. skull)

Hidden compartments in AVMs – A new concept . . . 2
Nontraumatic spinal epidural hematomas. MR features . . . 8
Brain lesion contrast in MR imaging. Dependence on field strength and concentration of gadodiamide injection in patients and phantoms . . . 14
Time-dependency in brain lesion enhancement with gadodiamide injection . . . 19
Combined endovascular and surgical treatment in vertebral arteriovenous fistula. A case report . . . 25
SIPAP – A new MR classification for pituitary adenomas . . . 30
Intracranial aneurysm following radiation therapy for medulloblastoma. A case report and review of the literature . . . 37
Cranial MR findings in Wilson's disease . . . 250
CT and MR imaging in primary cerebral non-Hodgkin's lymphoma . . . 259
Brain penetration and neurological effects of gadobenate dimeglumine in the rat . . . 268
Transient global amnesia after cerebral angiography. A case report . . . 273
Ultrasound-guided 1.2-mm cutting-needle biopsies of head and neck tumours . . . 376
Gliomatosis cerebri – an appropriate diagnosis? Case reports . . . 381
The value of MR imaging in prevention of unsuccessful back surgery. A case report . . . 464
MR evaluation of CSF fistulae . . . 603
MR imaging of experimental subdural bleeding. Correlates of brain deformation and tissue water content, and changes in vital physiological parameters 610
Cerebral CT angiography in the diagnosis of acute subarachnoid hemorrhage . . . 791
Angiography in non-traumatic brain haematoma. An analysis of 100 cases . . . 797
Craniocaudal motion velocity in the cervical spinal cord in degenerative disease as shown by MR imaging . . . 803
MR imaging in squamous cell carcinoma of the head and neck with no palpable lymph nodes . . . 810
Hidden compartments in intracranial arteriovenous malformation . . . 922
MR imaging of the central nervous system in diving-related decompression illness . . . 940
Supratentorial primary intra-axial tumors in children. MR and CT evaluation . . . 945
Proton (^{1}H) MR spectroscopy for routine diagnostic evaluation of brain lesions . . . 953
The perfusion fraction in volunteers and in patients with ischaemic stroke . . . 961

Ear, nose, throat and eye

Digital fluoroscopy before and after laser uvulopalatopharyngoplasty in obstructive sleep apnea. Importance of pharyngeal collapsibility and hyoid bone position . . . 214

Bones, joints and soft tissues

Scintigraphy and ultrasonography in differentiating osteomyelitis from bone infarction in sickle cell disease . . . 139
Radiography and bone scintigraphy in bone marrow transplant multiple myeloma patients . . . 144
Evaluation of knee-joint cartilage and menisci ten years after isolated and combined ruptures of the medial collateral ligament. Investigation by weight-bearing, radiography, MR imaging and analysis of proteoglycan fragments in the joint fluid . . . 151
Hemodialysis-related arthropathy. A prospective MR study with SE and GRE sequences . . . 158
MR and CT anatomy of the axilla . . . 198
Dynamic ultrasonography of the infant hip with suspected instability. A new technique . . . 206
Influence of osteophytic size on bone mineral density measured by dual X-ray absorptiometry . . . 210
Ultrasound characteristics of five common soft-tissue tumours in the hand and forearm . . . 348
A statistical model for ultrasound diagnosis of soft-tissue tumours in the hand and forearm . . . 355
Isolated fracture of the posterolateral tibial lip (Volksmann's triangle) . . . 359
Relevancy of radiographic features in elbow fractures 363
Intramuscular myxoma and fibrous dysplasia of bone – Mazabraud's syndrome. A case report . . . 368
The value of MR imaging in prevention of unsuccessful back surgery. A case report . . . 464
Ultrasound diagnosis of soft-tissue tumours in the hand and forearm. A prospective study . . . 508
Computed radiography for characterisation of the weight-bearing knee . . . 514
Width of the medial tibiotalar joint . . . 520
Diagnosis of Hill-Sachs lesion of the shoulder. Comparison between ultrasonography and arthro-CT . . 523
CT measurement of anteversion in the femoral neck. The influence of femur positioning . . . 527
Dynamic scintigraphy of bone and bone marrow in multiple myeloma patients with bone-marrow transplants . . . 533
Dual-energy X-ray absorptiometric densitometry in osteoarthritis of the hip. Influence of secondary bone remodeling of the femoral neck . . . 539
Epiphyseal bone-marrow abnormalities and restitution

in Legg-Calvé-Perthes disease. Evaluation by MR imaging in 86 cases 855
MR findings in cases of suspected impacted fracture of the femoral neck 863
Sonographic evaluation of hip effusion in children . . 867
CT in the sacroiliac joints. Dosimetry and optimal settings for a high-resolution technique 870
MR imaging of meniscal subluxation in the knee . . . 876
GRASE: Ultra-fast turbo gradient spin-echo sequence. A new approach to fast MR imaging of the musculoskeletal system 880
Kinematic MR imaging of the ankle – initial results with ultra-fast sequence imaging 885
Assessment of suspected bone metastases. CT with and without clinical information compared to CT-guided bone biopsy 890
Bone-marrow MR imaging before and after autologous marrow transplantation in lymphoma patients without known bone-marrow involvement . . 896
CT, MR imaging and muscle biopsy in severe crush injury 903
A case of hyperoxaluria. Radiological aspects 1031
Evaluation of the post-operative lumbar spine with MR imaging. The role of contrast enhancement and thickening in nerve roots 1035
Cine-MR imaging of the shoulder 1043
MR-guided joint puncture and real-time MR-assisted contrast media application 1047
MR imaging of the wrist in carpal tunnel syndrome 1050
A new radiographic method for evaluating the degree of sliding in devices used in hip-fracture surgery . .1057
Postero-anterior radiogram of the knee in weight-bearing and semiflexion. Comparison with MR imaging 1063
Magnetization transfer and spin lock MR imaging of patellar cartilage degeneration at 0.1 T 1071
Correlation of T1 and T2 relaxation rates in normal bone-marrow water with serum ferritin concentration 1076

Breast

MR imaging of primary non-Hodgkin's breast lymphoma. A case report 104
Mammography in women undergoing hormone replacement therapy. Possible effects revealed at routine examination 228
Ultrasound-guided fine needle aspiration biopsy in the diagnosis of breast cancer recurrence after mastectomy 232
Intraductal placement of a Kopans spring-hookwire guide to localize nonpalpable breast lesions detected by galactography 240
Diagnostic accuracy of mammography and contrast-enhanced MR imaging in 238 histologically verified breast lesions 489
Interobserver variation in the interpretation of breast imaging. Comparison of mammography, ultrasonography, and both combined in the interpretation of palpable noncalcified breast masses 497
Solid nonpalpable breast lesions. Success and failure of guided fine-needle aspiration cytology in a consecutive series of 2444 cases 815

Cardiovascular system

Hidden compartments in AVMs – A new concept . . . 2
Combined endovascular and surgical treatment in vertebral arteriovenous fistula. A case report 25
Intracranial aneurysm following radiation therapy for medulloblastoma. A case report and review of the literature 37
Gadolinium-enhanced 3D time-of-flight MR angiography. Experimental and clinical evaluation 47
Outcome of bypass surgery in patients with chronic ischemic left ventricular dysfunction. Predictive value of MR imaging 76
Rater agreement at lung scintigraphy after consensus training 92
CT findings at lupus mesenteric vasculitis 115
Chronic post-traumatic pseudoaneurysm of the abdominal aorta diagnosed by duplex Doppler ultrasonography. A case report 121
Proliferative response in smooth muscle cells after angioplasty or insertion of self-expanding stents. An experimental study in pigs 124
K-space filter effect in three-dimensional contrast MR angiography 173
Variable tip angle slab selection pulses for carotid and cerebral time-of-flight MR angiography. Theory and experimental analysis 275
Phase-contrast MR angiography for detection of arteriosclerotic renal artery stenosis 287
Percutaneous transsplenic catheterization of the portal venous system 292
Optimization of ascending phlebography of the leg for screening of deep vein thrombosis in thromboprophylactic trials 320
Triplex US in the diagnosis of asymptomatic deep venous thrombosis 327
The shortening fraction of myocardial fibers and its layered distribution, as derived from cine-MR imaged left ventriculograms. An approach for evaluating globar left ventricular function 391
Adding a visual linear scale probability to the PIOPED probability of pulmonary embolism 458
Quantification of area at risk during coronary occlusion and reperfusion by means of MR perfusion imaging 479
Validation of a new system in quantitative coronary arteriography 503
CT arterial portography and CT arteriography with a triple-lumen balloon catheter 553
Transjugular intrahepatic portosystemic shunt (TIPS).

Thrombogenicity in stents and its effect on shunt patency 558
Peak systolic velocity, resistance index and pulsatility index. Variations in measuring a pre-recorded videotape 598
Cerebral CT angiography in the diagnosis of acute subarachnoid hemorrhage 791
Role of MR venography in the evaluation of deep venous thrombosis 907
Hidden compartments in intracranial arteriovenous malformation 922

Mediastinum and respiratory system

Helical CT in evaluation of the bronchial tree 83
Rater agreement at lung scintigraphy after consensus training 92
Sonographic measurement of thymic size in healthy neonates. Relation to clinical variables 95
Lung nodule conspicuity using unsharp mask filters with storage-phosphor-based computed radiography 99
Thymus size evaluated by sonography. A longitudinal study on infants during the first year of life 222
Lung torsion – a rare postoperative complication. A case report 243
Thin-section oblique CT with 25° cranially tilted images. Evaluation of pulmonary tumors adjacent to the interlobar fissures 246
Adding a visual linear scale probability to the PIOPED probability of pulmonary embolism 458
Transcutaneous needle biopsy of the lung 821
Progress of emphysema in severe α_1-antitrypsin deficiency as assessed by annual CT 826
Malignant lymphoma arising from chronic tuberculous empyema. A case report 833
Detection of normal mediastinal lymph nodes by ultrasonography 965

Digestive tract

Addition of methyl cellulose enema to double-contrast barium imaging of sigmoid diverticulosis 73
Association of midoesophageal diverticula with oesophageal motor disorders. Videofluoroscopy and manometry 108
Diverticulitis of the sigmoid colon. A comparison of CT, colonic enema and laparoscopy 313
Rectal tumours – MR imaging with endorectal and/or phased-array coils, and histopathological staging on giant sections. A comparative study 437
Defaeco-peritoneography in the diagnosis of rectal intussusception and rectal prolapse 578
Liver imaging. Clinical applications and future perspectives 626
Air enema used in the evaluation of acute colitis. A comparison between instant radiography and endoscopy 850
Absorbed dose and image quality in examinations of the colon with digital and analogue techniques . . . 1010

Liver, biliary tract

An iodinated lipid emulsion for CT of the liver. Comparison with iohexol in the detection of experimental hepatic metastases 55
Sonomorphology of the gallbladder in critically ill patients. Value of a scoring system and follow-up examinations 129
Dysprosium-enhanced MR imaging for tumor tissue characterization. An experimental study in a human xenograft model 281
Percutaneous transsplenic catheterization of the portal venous system 292
Accessory lobe of the liver mimicking a mass in the left adrenal gland. A case report 309
Technical aspects of catheter-related interventions in the liver of the rabbit 332
CT of experimental hepatoma using the hepatocyte-specific lipid emulsion FP 736-03 400
CT with the hepatocyte-specific contrast medium FP 736-04 in an experimental model of liver steatosis 405
Percutaneous microwave coagulation therapy in liver tumors. A 3-year experience 410
Rim enhancement in colorectal metastases at CT during infusion hepatic arteriography. Does it represent liver parenchyma or live tumor cell zone? 416
Visualization of tumor vessels in hepatocellular carcinoma. Power Doppler compared with color Doppler and angiography 422
Agenesis of the right lobe of the liver. Case report . . 428
CT arterial portography and CT arteriography with a triple-lumen balloon catheter 553
Transjugular intrahepatic portosystemic shunt (TIPS). Thrombogenicity in stents and its effect on shunt patency 558
Optimal MR protocol for hepatic hemangiomas. Comparison of conventional spin-echo sequences with T2-weighted turbo spin-echo and serial gradient-echo (FLASH) sequences with gadolinium enhancement 565
Magnetic iron oxide particles coated with carboxydextran for parenteral administration and liver contrasting. Pre-clinical profile of SH U555A 584
Liver imaging. Clinical applications and future perspectives 626
MnDPDP for MR imaging of the liver. Results from the European phase III studies 631
MnDPDP for MR imaging of the liver. Results of an independent image evaluation of the European phase III studies 638
Diagnostic efficacy of MnDPDP in MR imaging of the liver. A phase III multicentre study 643

MnDPDP-enhanced MR imaging of the liver. Correlation with surgical findings 650
Tumoral portal vein thrombosis. Enhancement with MnDPDP 655
MnDPDP enhancement in rabbit liver after intravenous bolus injection and slow infusion 717
Clinical implications of studies with MnDPDP in animal models of hepatic abnormalties 724
Compulsory superselective arterial embolization in hypovascular local hepatic tumor ablation. Microballoon coaxial catheterization 836
Diagnosis of liver metastases from colorectal adenocarcinoma. Comparison of spiral-CTAP combined with intravenous contrast-enhanced spiral-CT and SPIO-enhanced MR combined with plain MR imaging 986
Single-session alcohol sclerotherapy in benign symptomatic hepatic cysts 993
Human hepatic carbohydrate metabolism. Dynamic observation using ^{13}C MRS without proton decoupling 998
CT with different doses of the hepatocyte-specific contrast medium FP 736-03. Evaluation in a nude-rat model of experimental metastases 1003
Choledochoduodenal fistula secondary to duodenal peptic ulcer. A case report 1007

Spleen, pancreas

Functioning islet cell tumor of the pancreas. Localization with dynamic spiral CT 135
Blunt pancreatic trauma. Role of CT 543
Endoscopically inserted stent as treatment for pancreatic ascites. A case report 550
Overview of MnDPDP as a pancreas-specific contrast agent for MR imaging 660

Abdomen

Abdominal CT features and survival in acquired immunodeficiency 970
CT-guided core-needle biopsy in omental pathology . 978
Morphometric measurement of abdominal organs. Comparison of ultrasound and spiral CT 982

Urogenital system

Renal CT after intravenous injection of nonionic dimeric or nonionic monomeric contrast media in healthy volunteers 61
Evaluation of single sample clearance calculation in 902 patients. A comparison of multiple and single sample techniques 68
Diabetic nephropathy. Comparison of conventional and duplex Doppler ultrasonographic findings . . . 296
Assessment of the penile vascular system with color-coded duplex sonography and pharmacocavernosometry and -graphy in impotent men 303
Yield and complications in percutaneous renal biopsy. A comparison between ultrasound-guided gun-biopsy and manual techniques in native and transplant kidneys 431
Effect of ultrasound contrast medium in color Doppler and power Doppler visualization of blood flow in canine kidneys 445
Percutaneous nephrostomy with real-time sonographic guidance 454
Characterization of sonographically indeterminate ovarian tumors with MR imaging. A logistic regression analysis 572
Renal vascular resistance in autosomal dominant polycystic kidney disease. Evaluation with color Doppler ultrasound 840
Radiological findings in serous surface papillary carcinoma of the ovary. Case reports 847
Unusual imaging presentations in renal transitional cell carcinoma 1015
Recurrent varicocele. Demonstration by 3D phase-contrast MR angiography 1020
Pelvic pain syndrome caused by ovarian varices. Treatment by transcatheter embolization 1023
Resistive index of the intrascrotal artery in scrotal inflammatory disease 1026
A case of hyperoxaluria. Radiological aspects 1031
Urine viscosity after injections of iotrolan or of iomeprol 1079

Endocrine system

Characterization of sonographically indeterminate ovarian tumors with MR imaging. A logistic regression analysis 572
Radiological findings in serous surface papillary carcinoma of the ovary. Case reports 847

Lymphatic system

Frequency of unexpected multifocal metastasis in patients with acute spinal cord compression. Evaluation by low-field MR imaging in cancer patients 372

Pediatric radiology

Sonographic measurement of thymic size in healthy neonates. Relation to clinical variables 95
Dynamic ultrasonography of the infant hip with suspected instability. A new technique 206
Thymus size evaluated by sonography. A longitudinal study on infants during the first year of life 222
MR findings in cases of suspected impacted fracture of the femoral neck 863
Sonographic evaluation of hip effusion in children . . 867
Supratentorial primary intra-axial tumors in children. MR and CT evaluation 945

Digital radiography

Lung nodule conspicuity using unsharp mask filters with storage-phosphor-based computed radiography 99
Radiation doses and image information in digital pelvimetry with a phosphorous screen 181

Ultrasonography

Sonographic measurement of thymic size in healthy neonates. Relation to clinical variables 95
Chronic post-traumatic pseudoaneurysm of the abdominal aorta diagnosed by duplex Doppler ultrasonography. A case report 121
Sonomorphology of the gallbladder in critically ill patients. Value of a scoring system and follow-up examinations 129
Scintigraphy and ultrasonography in differentiating osteomyelitis from bone infarction in sickle cell disease 139
Dynamic ultrasonography of the infant hip with suspected instability. A new technique 206
Thymus size evaluated by sonography. A longitudinal study on infants during the first year of life 222
Ultrasound-guided fine needle aspiration biopsy in the diagnosis of breast cancer recurrence after mastectomy 232
Diabetic nephropathy. Comparison of conventional and duplex Doppler ultrasonographic findings . . . 296
Assessment of the penile vascular system with color-coded duplex sonography and pharmacocavernosometry and -graphy in impotent men 303
Triplex US in the diagnosis of asymptomatic deep venous thrombosis 327
Ultrasound characteristics of five common soft-tissue tumours in the hand and forearm 348
A statistical model for ultrasound diagnosis of soft-tissue tumours in the hand and forearm 355
Ultrasound-guided 1.2-mm cutting-needle biopsies of head and neck tumours 376
Visualization of tumor vessels in hepatocellular carcinoma. Power Doppler compared with color Doppler and angiography 422
Yield and complications in percutaneous renal biopsy. A comparison between ultrasound-guided gun-biopsy and manual techniques in native and transplant kidneys 431
Effect of ultrasound contrast medium in color Doppler and power Doppler visualization of blood flow in canine kidneys 445
Percutaneous nephrostomy with real-time sonographic guidance 454
Interobserver variation in the interpretation of breast imaging. Comparison of mammography, ultrasonography, and both combined in the interpretation of palpable noncalcified breast masses 497
Ultrasound diagnosis of soft-tissue tumours in the hand and forearm. A prospective study 508
Diagnosis of Hill-Sachs lesion of the shoulder. Comparison between ultrasonography and arthro-CT . . 523
Peak systolic velocity, resistance index and pulsatility index. Variations in measuring a pre-recorded videotape 598
Renal vascular resistance in autosomal dominant polycystic kidney disease. Evaluation with color Doppler ultrasound 840
MR findings in cases of suspected impacted fracture of the femoral neck 863
Sonographic evaluation of hip effusion in children . . 867
Detection of normal mediastinal lymph nodes by ultrasonography 965
Morphometric measurement of abdominal organs. Comparison of ultrasound and spiral CT 982
Resistive index of the intrascrotal artery in scrotal inflammatory disease 1026

CT

An iodinated lipid emulsion for CT of the liver. Comparison with iohexol in the detection of experimental hepatic metastases 55
Renal CT after intravenous injection of nonionic dimeric or nonionic monomeric contrast media in healthy volunteers 61
Helical CT in evaluation of the bronchial tree 83
CT findings at lupus mesenteric vasculitis 115
Functioning islet cell tumor of the pancreas. Localization with dynamic spiral CT 135
MR and CT anatomy of the axilla 198
Thin-section oblique CT with 25° cranially tilted images. Evaluation of pulmonary tumors adjacent to the interlobar fissures 246
CT and MR imaging in primary cerebral non-Hodgkin's lymphoma 259
Diverticulitis of the sigmoid colon. A comparison of CT, colonic enema and laparoscopy 313
CT of experimental hepatoma using the hepatocyte-specific lipid emulsion FP 736-03 400
CT with the hepatocyte-specific contrast medium FP 736-04 in an experimental model of liver steatosis 405
Rim enhancement in colorectal metastases at CT during infusion hepatic arteriography. Does it represent liver parenchyma or live tumor cell zone? 416
Computed radiography for characterisation of the weight-bearing knee 514
Diagnosis of Hill-Sachs lesion of the shoulder. Comparison between ultrasonography and arthro-CT . . 523
CT measurement of anteversion in the femoral neck. The influence of femur positioning 527
Blunt pancreatic trauma. Role of CT 543
CT arterial portography and CT arteriography with a triple-lumen balloon catheter 553

Cerebral CT angiography in the diagnosis of acute subarachnoid hemorrhage 791
Progress of emphysema in severe α_1-antitrypsin deficiency as assessed by annual CT 826
CT in the sacroiliac joints. Dosimetry and optimal settings for a high-resolution technique 870
Assessment of suspected bone metastases. CT with and without clinical information compared to CT-guided bone biopsy 890
CT, MR imaging and muscle biopsy in severe crush injury 903
Optimising imaging parameters in experimental spiral CT 913
Supratentorial primary intra-axial tumors in children. MR and CT evaluation 945
Abdominal CT features and survival in acquired immunodeficiency 970
CT-guided core-needle biopsy in omental pathology . 978
Morphometric measurement of abdominal organs. Comparison of ultrasound and spiral CT 982
Diagnosis of liver metastases from colorectal adenocarcinoma. Comparison of spiral-CTAP combined with intravenous contrast-enhanced spiral-CT and SPIO-enhanced MR combined with plain MR imaging 986
CT with different doses of the hepatocyte-specific contrast medium FP 736-03. Evaluation in a nude-rat model of experimental metastases 1003
A simple device for the stereoscopic display of 3D CT images 1053

MR imaging and spectroscopy

Nontraumatic spinal epidural hematomas. MR features 8
Brain lesion contrast in MR imaging. Dependence on field strength and concentration of gadodiamide injection in patients and phantoms 14
SIPAP – A new MR classification for pituitary adenomas 30
Interventional MR imaging. Demonstration of the feasibility of the Overhauser marker enhancement (OMEN) technique 43
Gadolinium-enhanced 3D time-of-flight MR angiography. Experimental and clinical evaluation 47
Outcome of bypass surgery in patients with chronic ischemic left ventricular dysfunction. Predictive value of MR imaging 76
MR imaging of primary non-Hodgkin's breast lymphoma. A case report 104
Evaluation of knee-joint cartilage and menisci ten years after isolated and combined ruptures of the medial collateral ligament. Investigation by weight-bearing radiography, MR imaging and analysis of proteoglycan fragments in the joint fluid 151
Hemodialysis-related arthropathy. A prospective MR study with SE and GRE sequences 158
An independent software system for the analysis of dynamic MR images 165
K-space filter effect in three-dimensional contrast MR angiography 173
MR and CT anatomy of the axilla 198
Cranial MR findings in Wilson's disease 250
CT and MR imaging in primary cerebral non-Hodgkin's lymphoma 259
Variable tip angle slab selection pulses for carotid and cerebral time-of-flight MR angiography. Theory and experimental analysis 275
Dysprosium-enhanced MR imaging for tumor tissue characterization. An experimental study in a human xenograft model 281
Phase-contrast MR angiography for detection of arteriosclerotic renal artery stenosis 287
Frequency of unexpected multifocal metastasis in patients with acute spinal cord compression. Evaluation by low-field MR imaging in cancer patients 372
The shortening fraction of myocardial fibers and its layered distribution, as derived from cine-MR imaged left ventriculograms. An approach for evaluating globar left ventricular function 391
Rectal tumours – MR imaging with endorectal and/or phased-array coils, and histopathological staging on giant sections. A comparative study 437
The value of MR imaging in prevention of unsuccessful back surgery. A case report 464
Quantification of area at risk during coronary occlusion and reperfusion by means of MR perfusion imaging 479
Diagnostic accuracy of mammography and contrast-enhanced MR imaging in 238 histologically verified breast lesions 489
Optimal MR protocol for hepatic hemangiomas. Comparison of conventional spin-echo sequences with T2-weighted turbo spin-echo and serial gradient-echo (FLASH) sequences with gadolinium enhancement 565
Characterization of sonographically indeterminate ovarian tumors with MR imaging. A logistic regression analysis 572
Magnetic iron oxide particles coated with carboxydextran for parenteral administration and liver contrasting. Pre-clinical profile of SH U555A 584
MR evaluation of CSF fistulae 603
MR imaging of experimental subdural bleeding. Correlates of brain deformation and tissue water content, and changes in vital physiological parameters 610
Liver imaging. Clinical applications and future perspectives 626
MnDPDP for MR imaging of the liver. Results from the European phase III studies 631
MnDPDP for MR imaging of the liver. Results of an independent image evaluation of the European phase III studies 638

Diagnostic efficacy of MnDPDP in MR imaging of the liver. A phase III multicentre study 643
MnDPDP-enhanced MR imaging of the liver. Correlation with surgical findings 650
Tumoral portal vein thrombosis. Enhancement with MnDPDP 655
Overview of MnDPDP as a pancreas-specific contrast agent for MR imaging 660
MR imaging properties and pharmacokinetics of MnDPDP in healthy volunteers 665
Metabolism and pharmacokinetics of MnDPDP in man 677
Plasma pharmacokinetics, tissue distribution and excretion of MnDPDP in the rat and dog after intravenous administration 690
Comparison of manganese biodistribution and MR contrast enhancement in rats after intravenous injection of MnDPDP and $MnCl_2$ 700
NMR relaxation studies with MnDPDP 708
MnDPDP enhancement in rabbit liver after intravenous bolus injection and slow infusion 717
Clinical implications of studies with MnDPDP in animal models of hepatic abnormalties 724
Tissue distribution and general safety of MnDPDP in male beagle dogs, with or without total common bile duct obstruction 732
Cardiovascular safety of MnDPDP and $MnCl_2$ 740
Cardiovascular effects of MnDPD and $MnCl_2$ in dogs with acute ischaemic heart failure 750
The reproductive toxicology of intravenously administered MnDPDP in the rat and rabbit 759
General toxicology of MnDPDP 770
Physicochemical characterisation of mangafodipir trisodium 780
Craniocaudal motion velocity in the cervical spinal cord in degenerative disease as shown by MR imaging 803
MR imaging in squamous cell carcinoma of the head and neck with no palpable lymph nodes 810
Epiphyseal bone-marrow abnormalities and restituion in Legg-Calvé-Perthes disease. Evaluation by MR imaging in 86 cases 855
MR findings in cases of suspected impacted fracture of the femoral neck 863
MR imaging of meniscal subluxation in the knee ... 876
GRASE: Ultra-fast turbo gradient spin-echo sequence. A new approach to fast MR imaging of the musculoskeletal system 880
Kinematic MR imaging of the ankle – initial results with ultra-fast sequence imaging 885
Bone-marrow MR imaging before and after autologous marrow transplantation in lymphoma patients without known bone-marrow involvement .. 896
CT, MR imaging and muscle biopsy in severe crush injury 903
Role of MR venography in the evaluation of deep venous thrombosis 907
MR imaging of the central nervous system in diving-related decompression illness 940
Supratentorial primary intra-axial tumors in children. MR and CT evaluation 945
Proton (^1H) MR spectroscopy for routine diagnostic evaluation of brain lesions 953
The perfusion fraction in volunteers and in patients with ischaemic stroke 961
Diagnosis of liver metastases from colorectal adenocarcinoma. Comparison of spiral-CTAP combined with intravenous contrast-enhanced spiral-CT and SPIO-enhanced MR combined with plain MR imaging ... 986
Human hepatic carbohydrate metabolism. Dynamic observation using ^{13}C MRS without proton decoupling 998
Recurrent varicocele. Demonstration by 3D phase-contrast MR angiography 1020
Evaluation of the post-operative lumbar spine with MR imaging. The role of contrast enhancement and thickening in nerve roots 1035
Cine-MR imaging of the shoulder 1043
MR-guided joint puncture and real-time MR-assisted contrast media application 1047
MR imaging of the wrist in carpal tunnel syndrome 1050
Postero-anterior radiogram of the knee in weight-bearing and semiflexion. Comparison with MR imaging 1063
Magnetization transfer and spin lock MR imaging of patellar cartilage degeneration at 0.1 T 1071
Correlation of T1 and T2 relaxation rates in normal bone-marrow water with serum ferritin concentration 1076
An *in vitro* ^1H-MRS model of oncogene transfection. The spectral feature of c-erbB-2 and c-Ha-ras transfected NIH3T3 fibroblast cells 1083

Nuclear radiology

Rater agreement at lung scintigraphy after consensus training 92
Scintigraphy and ultrasonography in differentiating osteomyelitis from bone infarction in sickle cell disease 139
Radiography and bone scintigraphy in bone marrow transplant multiple myeloma patients 144
Adding a visual linear scale probability to the PIOPED probability of pulmonary embolism 458
Dynamic scintigraphy of bone and bone marrow in multiple myeloma patients with bone-marrow transplants 533
Combinations of nonlabeled, ^{125}I-labeled, and anti-idiotypic antiplacental alkaline phosphatase monoclonal antibodies at experimental radioimmunotargeting 1087

Interventional radiology

Combined endovascular and surgical treatment in vertebral arteriovenous fistula. A case report 25

Proliferative response in smooth muscle cells after angioplasty or insertion of self-expanding stents. An experimental study in pigs 124
Ultrasound-guided fine needle aspiration biopsy in the diagnosis of breast cancer recurrence after mastectomy 232
Intraductal placement of a Kopans spring-hookwire guide to localize nonpalpable breast lesions detected by galactography 240
Percutaneous transsplenic catheterization of the portal venous system 292
Technical aspects of catheter-related interventions in the liver of the rabbit 332
A new catheter type for superselective angiography and embolization 335
Percutaneous microwave coagulation therapy in liver tumors. A 3-year experience 410
Yield and complications in percutaneous renal biopsy. A comparison between ultrasound-guided gun-biopsy and manual techniques in native and transplant kidneys 431
Percutaneous nephrostomy with real-time sonographic guidance 454
Endoscopically inserted stent as treatment for pancreatic ascites. A case report 550
Transjugular intrahepatic portosystemic shunt (TIPS). Thrombogenicity in stents and its effect on shunt patency 558
Solid nonpalpable breast lesions. Success and failure of guided fine-needle aspiration cytology in a consecutive series of 2444 cases 815
Transcutaneous needle biopsy of the lung 821
Compulsory superselective arterial embolization in hypovascular local hepatic tumor ablation. Microballoon coaxial catheterization 836
Assessment of suspected bone metastases. CT with and without clinical information compared to CT-guided bone biopsy 890
The origin of the word *stent* 937
CT-guided core-needle biopsy in omental pathology . 978
Single-session alcohol sclerotherapy in benign symptomatic hepatic cysts 993
Pelvic pain syndrome caused by ovarian varices. Treatment by transcatheter embolization 1023
MR-guided joint puncture and real-time MR-assisted contrast media application 1047

Experimental radiology

Proliferative response in smooth muscle cells after angioplasty or insertion of self-expanding stents. An experimental study in pigs 124
Time-resolved white light transillumination for optical imaging 185
Brain penetration and neurological effects of gadobenate dimeglumine in the rat 268
Variable tip angle slab selection pulses for carotid and cerebral time-of-flight MR angiography. Theory and experimental analysis 275
Dysprosium-enhanced MR imaging for tumor tissue characterization. An experimental study in a human xenograft model 281
Technical aspects of catheter-related interventions in the liver of the rabbit 332
A new catheter type for superselective angiography and embolization 335
Effect of ultrasound contrast medium in color Doppler and power Doppler visualization of blood flow in canine kidneys 445
MR imaging of experimental subdural bleeding. Correlates of brain deformation and tissue water content, and changes in vital physiological parameters 610
Plasma pharmacokinetics, tissue distribution and excretion of MnDPDP in the rat and dog after intravenous administration 690
Comparison of manganese biodistribution and MR contrast enhancement in rats after intravenous injection of MnDPDP and $MnCl_2$ 700
MnDPDP enhancement in rabbit liver after intravenous bolus injection and slow infusion 717
Clinical implications of studies with MnDPDP in animal models of hepatic abnormalties 724
Tissue distribution and general safety of MnDPDP in male beagle dogs, with or without total common bile duct obstruction 732
Cardiovascular effects of MnDPD and $MnCl_2$ in dogs with acute ischaemic heart failure 750
The reproductive toxicology of intravenously administered MnDPDP in the rat and rabbit 759
CT with different doses of the hepatocyte-specific contrast medium FP 736-03. Evaluation in a nude-rat model of experimental metastases 1003

Contrast media and other drugs

Brain lesion contrast in MR imaging. Dependence on field strength and concentration of gadodiamide injection in patients and phantoms 14
Time-dependency in brain lesion ehancement with gadodiamide injection 19
Gadolinium-enhanced 3D time-of-flight MR angiography. Experimental and clinical evaluation 47
An iodinated lipid emulsion for CT of the liver. Comparison with iohexol in the detection of experimental hepatic metastases 55
Renal CT after intravenous injection of nonionic dimeric or nonionic monomeric contrast media in healthy volunteers 61
Addition of methyl cellulose enema to double-contrast barium imaging of sigmoid diverticulosis 73
Brain penetration and neurological effects of gadobenate dimeglumine in the rat 268
Transient global amnesia after cerebral angiography. A case report 273

Dysprosium-enhanced MR imaging for tumor tissue characterization. An experimental study in a human xenograft model 281
Ispaghula (Vi-Siblin) versus standard preparation for barium enema 311
CT of experimental hepatoma using the hepatocyte-specific lipid emulsion FP 736-03 400
CT with the hepatocyte-specific contrast medium FP 736-04 in an experimental model of liver steatosis 405
Effect of ultrasound contrast medium in color Doppler and power Doppler visualization of blood flow in canine kidneys 445
Plasma levels of prekallikrein, alpha-2-macroglobulin and C1-esterase inhibitor in patients with urticarial reaction to contrast media 466
Optimal MR protocol for hepatic hemangiomas. Comparison of conventional spin-echo sequences with T2-weighted turbo spin-echo and serial gradient-echo (FLASH) sequences with gadolinium enhancement 565
Magnetic iron oxide particles coated with carboxydextran for parenteral administration and liver contrasting. Pre-clinical profile of SH U555A 584
Liver imaging. Clinical applications and future perspectives 626
MnDPDP for MR imaging of the liver. Results from the European phase III studies 631
MnDPDP for MR imaging of the liver. Results of an independent image evaluation of the European phase III studies 638
Diagnostic efficacy of MnDPDP in MR imaging of the liver. A phase III multicentre study 643
MnDPDP-enhanced MR imaging of the liver. Correlation with surgical findings 650
Tumoral portal vein thrombosis. Enhancement with MnDPDP 655
Overview of MnDPDP as a pancreas-specific contrast agent for MR imaging 660
MR imaging properties and pharmacokinetics of MnDPDP in healthy volunteers 665
Metabolism and pharmacokinetics of MnDPDP in man 677
Plasma pharmacokinetics, tissue distribution and excretion of MnDPDP in the rat and dog after intravenous administration 690
Comparison of manganese biodistribution and MR contrast enhancement in rats after intravenous injection of MnDPDP and $MnCl_2$ 700
NMR relaxation studies with MnDPDP 708
MnDPDP enhancement in rabbit liver after intravenous bolus injection and slow infusion 717
Clinical implications of studies with MnDPDP in animal models of hepatic abnormalties 724
Tissue distribution and general safety of MnDPDP in male beagle dogs, with or without total common bile duct obstruction 732
Cardiovascular safety of MnDPDP and $MnCl_2$ 740
Cardiovascular effects of MnDPD and $MnCl_2$ in dogs with acute ischaemic heart failure 750
The reproductive toxicology of intravenously administered MnDPDP in the rat and rabbit 759
General toxicology of MnDPDP 770
Physicochemical characterisation of mangafodipir trisodium 780
Permeability of contrast media through hemodialysis membrane 918
CT with different doses of the hepatocyte-specific contrast medium FP 736-03. Evaluation in a nude-rat model of experimental metastases 1003
Evaluation of the post-operative lumbar spine with MR imaging. The role of contrast enhancement and thickening in nerve roots 1035
Urine viscosity after injections of iotrolan or of iomeprol 1079
Combinations of nonlabeled, ^{125}I-labeled, and anti-idiotypic antiplacental alkaline phosphatase monoclonal antibodies at experimental radioimmunotargeting 1087

Physics and techniques

Interventional MR imaging. Demonstration of the feasibility of the Overhauser marker enhancement (OMEN) technique 43
Evaluation of single sample clearance calculation in 902 patients. A comparison of multiple and single sample techniques 68
Lung nodule conspicuity using unsharp mask filters with storage-phosphor-based computed radiography 99
Association of midoesophageal diverticula with oesophageal motor disorders. Videofluoroscopy and manometry 108
An independent software system for the analysis of dynamic MR images 165
K-space filter effect in three-dimensional contrast MR angiography 173
ROC-study of a teleradiology workstation versus film readings 176
Radiation doses and image information in digital pelvimetry with a phosphorous screen 181
Time-resolved white light transillumination for optical imaging 185
Influence of osteophytic size on bone mineral density measured by dual X-ray absorptiometry 210
Digital fluoroscopy before and after laser uvulopalatopharyngoplasty in obstructive sleep apnea. Importance of pharyngeal collapsibility and hyoid bone position 214
Teleradiology by two different concepts. Technical note 338
Dual-energy X-ray absorptiometric densitometry in osteoarthritis of the hip. Influence of secondary bone remodeling of the femoral neck 539

Defaeco-peritoneography in the diagnosis of rectal intussusception and rectal prolapse 578
CT in the sacroiliac joints. Dosimetry and optimal settings for a high-resolution technique 870
GRASE: Ultra-fast turbo gradient spin-echo sequence. A new approach to fast MR imaging of the musculoskeletal system 880
Kinematic MR imaging of the ankle – initial results with ultra-fast sequence imaging 885
Optimising imaging parameters in experimental spiral CT 913
Permeability of contrast media through hemodialysis membrane 918
Absorbed dose and image quality in examinations of the colon with digital and analogue techniques . . . 1010
A simple device for the stereoscopic display of 3D CT images 1053
A new radiographic method for evaluating the degree of sliding in devices used in hip-fracture surgery . . 1057
An *in vitro* ^{1}H-MRS model of oncogene transfection. The spectral feature of c-erbB-2 and c-Ha-ras transfected NIH3T3 fibroblast cells 1083

Miscellaneous

The origin and development of diagnostic radiology as illustrated by postage stamps 930
The origin of the word *stent* 937
